Education

Dwarkadas J. Sanghvi College of Engineering Aug. 2023 – Present
Mumbai, Maharashtra
Bachelor of Technology in Electronics Telecommunication, Honours in AIML

Experience

Backend Developer Intern June 2024 – August 2024
Teknogeeks, Remote Intern
- Developed and optimized REST APIs and integrated webhooks for enhanced functionality, contributing to the SpecsSync project with a focus on real-time data synchronization and efficient system integration.
- Worked closely with front-end teams, leveraging problem-solving skills and attention to detail to deliver solutions within tight deadlines.
- **Technical Skills:** Node.js, Express, MongoDB, REST APIs, Webhooks, Real-time Data Synchronization, System Integration, Git, JavaScript, AngularJs, Python, Machine Learning Model Integration, Flask.

Technical Skills

Languages: C, C++, Java, Python
Frontend: ReactJS, React Native, JavaScript, HTML, CSS, Redux, Tailwind,NextJs
Backend: Node.js, Express, Flask, Django, REST APIs, Webhooks
Database: MySQL, MongoDB, Firebase
Machine Learning: Scikit-learn,Numpy,Pandas
Other Skills: VsCode, Sublime, Postman, Jest, Linux, Critical Thinking, Leadership, Project Management, Problem Solving, Optimistic, Collaborative, Adaptability

Projects

ZENARA Multi Vendor Ecommerce Web Project Link
- Developed ZENARA e-commerce using MERN stack, ensuring high performance and seamless user experience.
- Crafted a visually appealing, responsive interface for ZENARA, enhancing the overall shopping experience.
- Implemented advanced product filtering and user-friendly "Add to Cart" functionality for efficient navigation and built an admin dashboard, empowering sellers with analytics and efficient management tools.
- **Tech Stack:** ReactJs, MongoDB, NodeJs, ExpressJs, Vite, JavaScript, FireBase

Plant Disease Detection Project Project Link
- **Integrated a third-party API** to identify plant diseases and detect common agricultural issues from uploaded images.
- **Designed and implemented RESTful APIs** for image upload functionality, using Cloudinary for image storage and serving.
- **Tech Stack:**ReactJS,Node.js, Express, Mongoose, Firebase Storage, Postman, MongoDB, API Integration

Voxify -AI APP — React Native app Project Link
- Voxify utilizes cutting-edge speech recognition technology to accurately transcribe spoken words into text in realtime.

Portfolio Project Link
- Technologies: Next.js, Tailwind CSS, Shadcn UI, TypeScript

Achievements

- Shortlisted in Internal Hackathon SIH(2024).
- 100+ DSA questions solved on GFG
